Rules compliance matrix

Source: the official International Track rules (Topic F, Agent Wallet). Status is "Met" only when a file in the repository shows it.

Rule or requirement	Status	Evidence in the repository
Topic F: AI wallet agent doing on-chain operations (asset management, execution, risk control)	Met	`nullwallet/policy.py`, `agent.py`, `onchain.py`; tiers T0 to T3
Deliverable 1: technical documentation (architecture, core algorithm, security design)	Met	`docs/NullWallet_Technical_Documentation.{ipynb,html,pdf}`, Sections 3 to 6
Deliverable 2: deck of at most 10 minutes	Met	`NullWallet_Deck.pptx`, 15 main slides with timed speaker notes, appendix not presented; slides notebook for Canva
Deliverable 3: demo video of at most 5 minutes (optional)	Met	`NullWallet_Demo.mp4`
Deliverable 4: source code with README, GitHub link, deployment instructions, test cases	Met once the GitHub link is added	`README.md`, `docs/GITHUB_SETUP.md`, `tests/` (51 tests)
Deliverable 5: security self-assessment (permission tiers and known-risk list)	Met	`docs/Security_Self_Assessment.pdf`
Deliverable 6: real on-chain transaction hashes (on-chain topic)	Met	`evidence/onchain_evidence.json`: 6 transactions on Base mainnet (chain id 8453), status 1; `python verify_onchain.py`
Scoring: task completion 40%	Addressed	Working pipeline, replay, 1,000-market Monte Carlo, independent rerun, out-of-course test
Scoring: security and compliance 30%	Addressed	Policy caps, allowlist, kill-switch, key isolation, injection tests, preflight, two live bugs found, fixed and logged
Scoring: innovation and interaction 30%	Addressed	`docs/INNOVATION.md`; chat and web demo
Bonus 0 to 5: on-chain exploration	Addressed	T1 attestations of the ledger head and five refusals on mainnet
Entries completed independently, free of plagiarism	Addressed, team to confirm	`results/originality_report.json`, `results/originality_vs_hwa.json`; AI assistance disclosed in the email and in the documentation
Third-party data, code and open-source components properly licensed	Addressed, team to confirm	`LICENSE` (MIT), `THIRD_PARTY.md`; the course data are not redistributed; Binance public market data used for the out-of-course test
At least 60% of the team non-Chinese nationals	Team to confirm	Registration form
Latest submission prevails; no changes after the deadline (20 Oct 2026 23:59 Beijing, 17:59 Stockholm)	Process	Send the single email before the deadline
Contact: info@ican-x.com	Process	Put in copy of the email

Items only the team can confirm

1. All team members agree on the origin and reuse of the work.
2. The course data licence permits using the data for this entry (they are not redistributed here).
3. The use of an AI assistant (Claude) for drafting and coding is permitted under "completed independently" and is disclosed in the email.
4. The Binance public data terms allow this use.
